Cost of Risk – Reduction / Containment

Cost of Risk = Premiums + Deductibles + Administration + Un-insured losses
Our Clients know that the true measure of value in an insurance plan isn't simply lower-negotiated rates at renewal time, but how well it supports your business objectives — your profitability — year after year.

Insurance Program Design

A well-designed plan is more than a portfolio of coverages. It's a custom set of built-in, sustaining risk strategies and solutions – driven towards reducing and containing your overall cost of risk.
